Owners Message

At Tigers , Our long standing Legacy and success have been build on principles of good corporate governance ,sound ethics, strong integrity and respect .

Tigers company employees are all expected to conduct business in accordance with the highest ethics standards reinforced in our code of ethics . The principal apply to every location in which we do business around the kingdom , as well as every employee, officer ,director and member of our board of directors.

Looking ahead , we are focused on accelerating the execution of our growth strategy while continuing to build on the strength of our service – in helping our clients share knowledge and create innovation and in bringing positive change to the communities in which we work and live.

Our Motto at Tigers is to invest in the experience of work force and the confidence of client for the two-fold development of both parties in the question. To ensure that we always sort our issues by means of Islamic sharia regularities to ensure justice ,righteousness in dealing with our staff ,clients , suppliers and partners . We are confident and determined proud to uphold such values

EXECUTIVE SUMMARY

Tigers Technologies. (Tigers) is considered to be one branch of Tigers Contracting company. It has been able to dramatically improve its clients' overall performance by offering them complete ICT & Low Current business solutions that specifically meet their needs and fit their qualifications

The company was originally established in 2012 to service the Group's own expanding needs, particularly in the area of computer aided design within the contracting business unit. It continues to fulfill this role today as it provides advanced IT solutions to all of the group's business units Today, The Company employs more than 30 professional employees.

we have professionals along with alliance partners with well know Products. Tigers is capable of delivering professionally designed and implemented complete low current solutions.

Our Objective

- ☐ We approaches every relationship with our customers with integrity, honesty, and a willingness to give a high standard of support.
- ☐ Our employees are certified on all equipment we install and support.
- ☐ Our Key Account Managers are well qualified and dedicated to customer's requirement.
- ☐ we strives to maintain the latest communications capabilities to ensure we are continuously at the forefront in the communications area.
- ☐ We has a well-defined process of quality assurance with a commitment to the best possible technology products, services, and support.

Vision:

Our vision is to be the leaders in providing World-class Service Quality, to become the choice of all who Request the best and accept no less than

the Best, to lead the quest of raising awareness towards High Quality Customer Care and service, showing both clients and their customers that Great Customer Service is in fact the essence of Investment in its purest form

Mission:

Our mission is to be the best our clients expects us to be, to provide the best service our clients expects to provide, to serve our clients customers the best way they desire and to constantly become Better

QUALITY & SAFETY

QUALITY

We operate a modified Quality Management System tailored to the specific requirements of each and every project undertaken. The system is regularly monitored and upgraded, to ensure our operations can deliver as a minimum, the agreed contract quality requirements. Each contract has a pre-contract quality plan

which is monitored and updated as the project progresses. A series of checks and inspections are used to ensure the quality plan is maintained to the highest standard, which guarantees that each and every contract is delivered to the satisfaction of the client and the design team.

We actively pursue the target of producing defect free handovers at practical completion, which minimizes the difficult interface between client and contractor at commissioning handover and occupation of the building.

Feedback from our clients at contract completion provides us with the opportunity for continued improvement in this important aspect of our customer focused business.

SAFETY

We believe safety is of paramount importance within the construction industry.

We enforce a Safety Program to keep a tight watch on the individual safety and security on which they can perform their duties with utmost safety, comfort and peace of mind.

QUALITY & SAFETY

Environmental Responsibility

We are committed to being an environmentally responsible and sustainable business. The strength of our commitment is demonstrated by our use of only the most environmentally friendly materials and construction techniques. This ensures we achieve a minimal impact on the environment in which we are operational, in either the long or short term. We pro-actively advise our customers on how to deal safely with asbestos or dispose of contaminated waste.

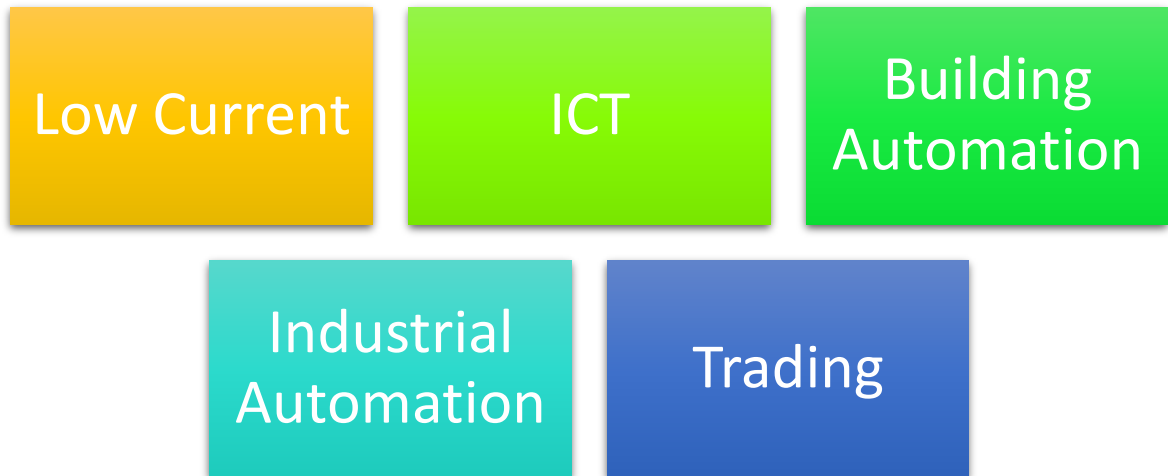

Team Work

Team work is a crucial element in Tigers Projects. Working together and pooling knowledge and experience ensures that every success is a shared victory.
